A range of applications.

Wrist band Event can be widely applied in theme parks, marathons, festivals and other areas of access control management.

Wrist band Event is the ultimate multi-day, high-security event management solution. The nylon material makes the wrist band comfortable to wear. The combination of the material, custom graphic, the high-strength plastic one-way sliding closure and the integrated RFID slider results in a wrist band that is secure, non-transferable and difficult to counterfeit.
